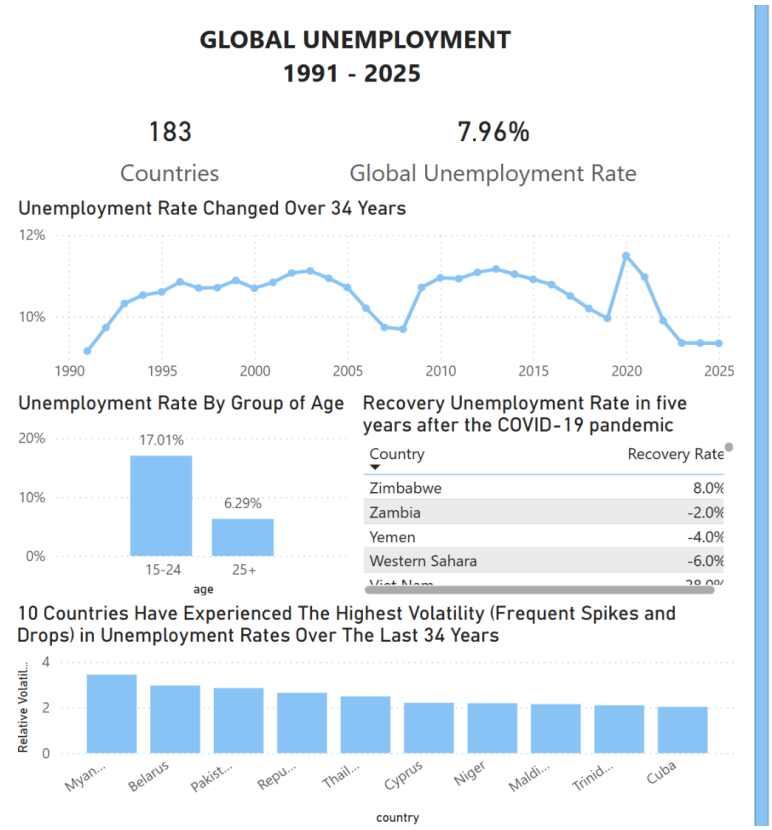
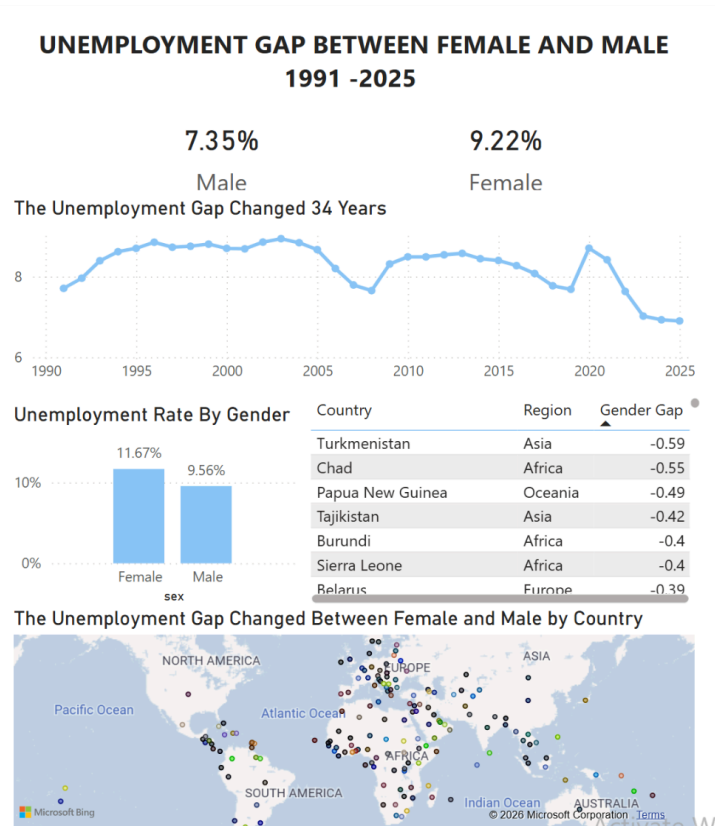
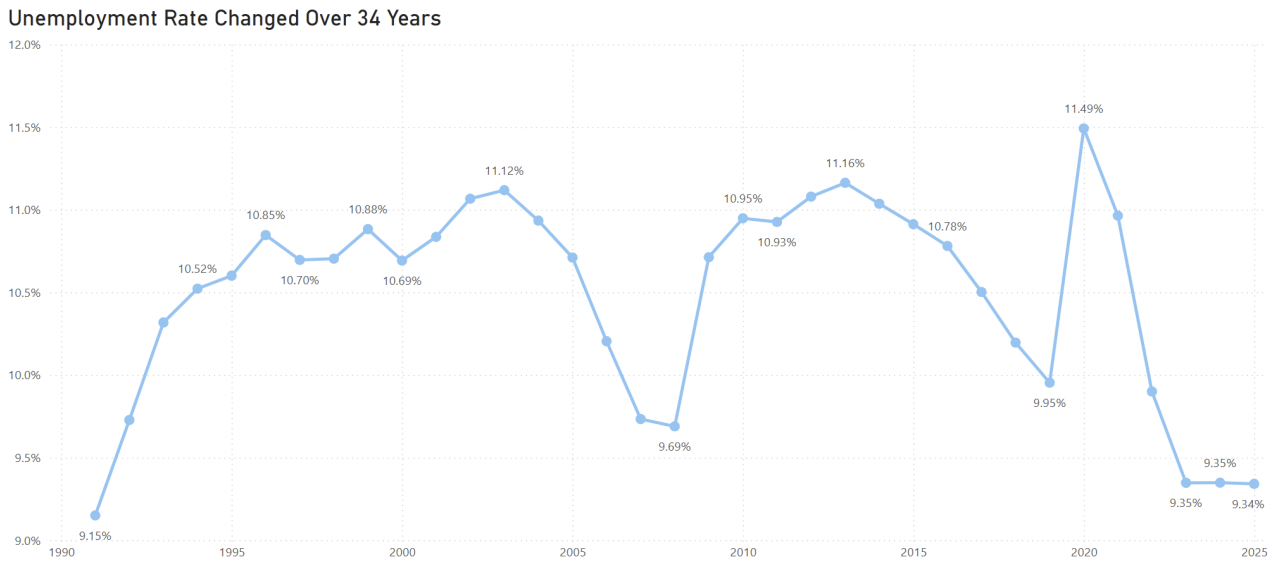
Analyze the Global Unemployment
1991 - 2025

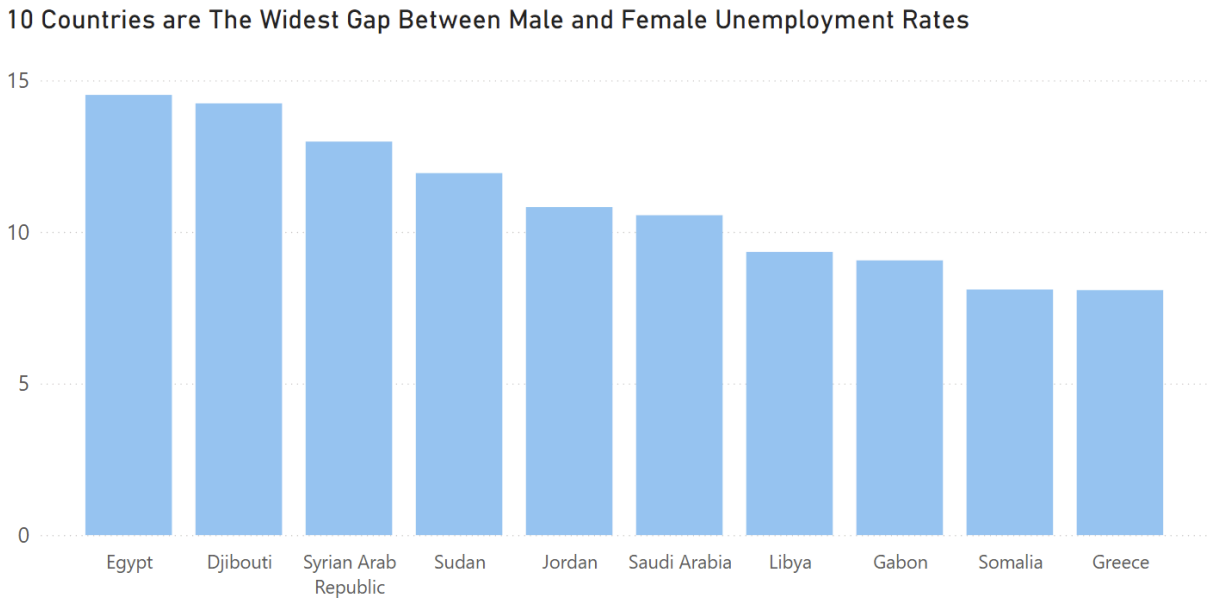
This project utilizes historical employment data (1991–2025) to perform an in-depth diagnostic of the global labor market. By implementing complex SQL queries to calculate **Unemployment Recovery Rates** following the 2020 economic shock, the study highlights the pace of stabilization across different regions. Additionally, the report features a comparative analysis of the **gender unemployment gap**, visualized through Power BI to identify long-term trends in labor equity.



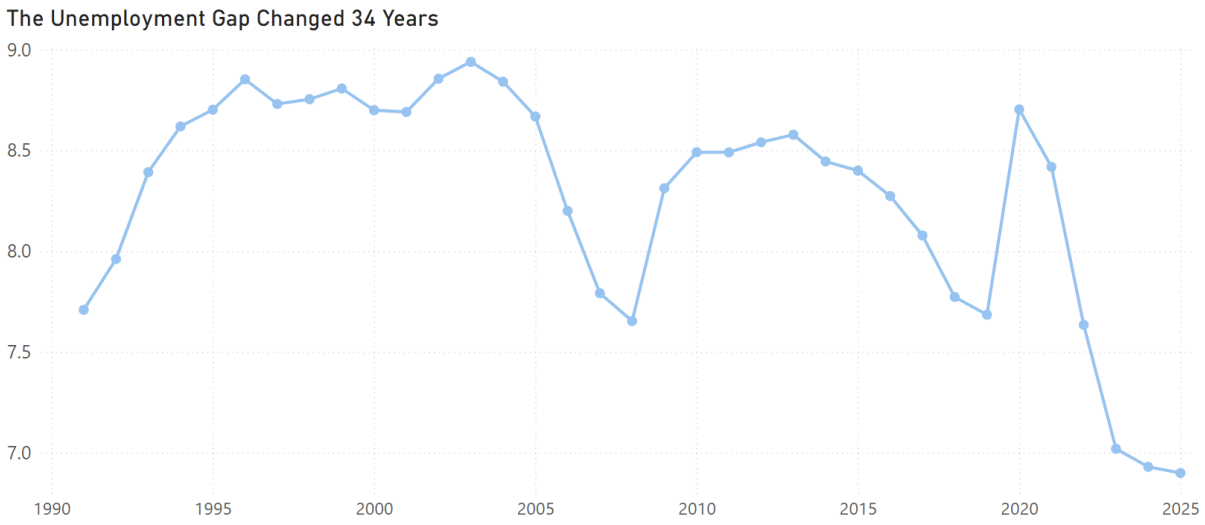




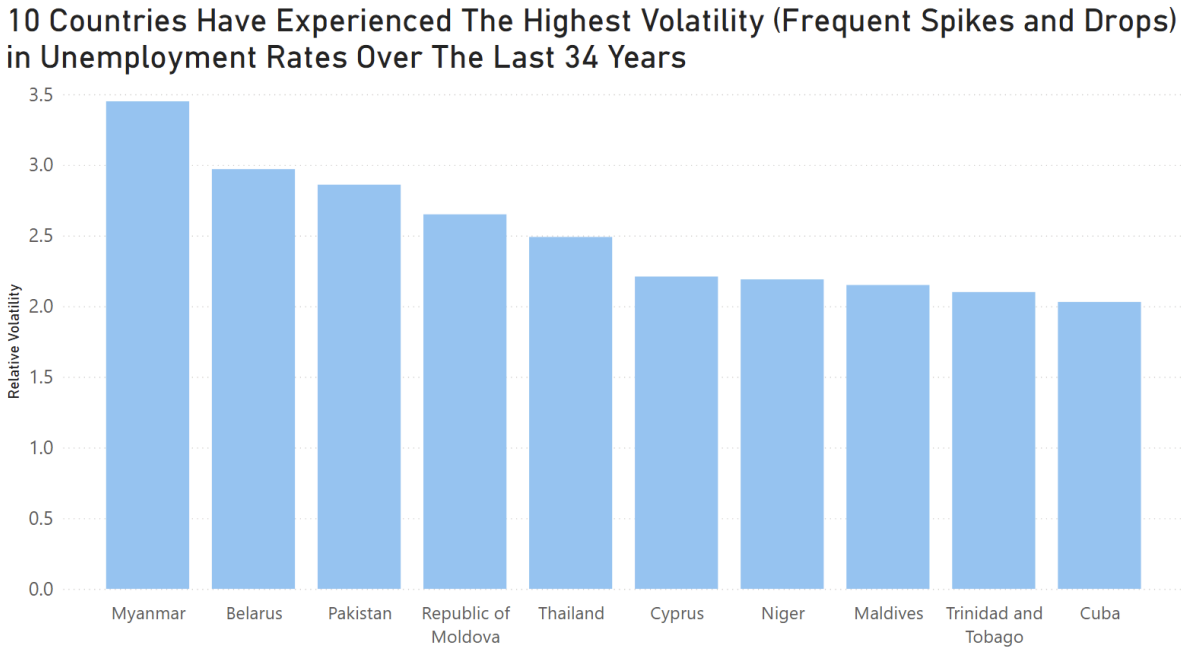
Question 1: In which countries is the gap between male and female unemployment rates the widest?



Question 2: Has this gap narrowed significantly since 1991?



Question 3: Which countries have experienced the highest volatility (frequent spikes and drops) in unemployment rates over the last 30 years?



Question 4: TOP countries' unemployment recovery rate after 5 years from Pandemic (2020)

Recovery Unemployment Rate in five years after the COVID-19 pandemic

Country	Recovery Rate
Saint Lucia	-63.0%
Bolivia (Plurinational State of)	-62.0%
Russian Federation	-62.0%
Saudi Arabia	-60.0%
Costa Rica	-58.0%
Brazil	-56.0%
Honduras	-55.0%
Hong Kong, China	-52.0%
Jamaica	-49.0%
Lao People's Democratic Republic	-49.0%
United Arab Emirates	-49.0%
Colombia	-48.0%
United States of America	-48.0%
Ecuador	-46.0%
Greece	-46.0%
India	-46.0%
